

Blagoj Anchev

Electrical Engineer for Antenna Systems

Is an electrical engineer with professional experience in the field of radio broadcasting, antenna systems, and FM radio communications. Since 2020, he has been employed at PE National Broadcasting in Skopje, where he works on the design, maintenance, and optimization of broadcasting systems and transmitter infrastructure.

His main specialization is the analysis and optimization of antenna systems, as well as FM signal propagation and coverage throughout North Macedonia. He has practical experience in RF measurements, antenna tuning, coaxial transmission systems, transmitters, and professional broadcasting equipment.

Throughout his career, he has participated in projects related to improving radio signal quality and stability, coverage analysis, and technical support for broadcasting networks.

Areas of Expertise:

- FM Broadcasting
- Antenna Systems
- RF Engineering and Signal Propagation
- Transmitter Systems
- Signal Coverage Analysis
- Broadcasting and Telecommunications Infrastructure
