

JANE JAKIMOVSKI

Professional Summary

Experienced radiocommunications specialist and senior leader with over 25 years of expertise in spectrum engineering, telecommunications and regulatory affairs. Holds a Master's degree in Telecommunications from the Faculty of Electrical Engineering at Ss. Cyril and Methodius University, Skopje. Demonstrates deep technical and strategic knowledge in planning and managing national radio frequency spectrum, including implementation and oversight of modern communication technologies such as WiMAX, 3G, DVB-T, 4G and 5G.

Since 2002, has built a distinguished career within the national telecommunications regulatory authority, progressing from a senior associate role to Head of the Radio Communications Sector. Proven track record in leading complex projects, including the implementation of advanced radio frequency management systems, and in directing multidisciplinary teams. Extensive experience in drafting regulatory frameworks and bylaws, ensuring compliance with international standards, including ITU regulations.

Recognized for strong leadership, policy development, and stakeholder coordination at both national and international levels. Combines technical expertise with strategic vision to support the evolution of telecommunications infrastructure and efficient spectrum utilization.
