

Lidija Paunovska is a distinguished telecommunications and spectrum management professional with more than two decades of extensive experience in electronic communications regulation, spectrum strategy, and digital connectivity development. Since joining the Agency for Electronic Communications of Macedonia in 2001, she has held a series of senior expert and leadership positions, demonstrating long-standing expertise in regulatory policy, spectrum governance, and advanced communications systems.

She currently serves as Head of the Broadcasting and Satellite Systems Division, where she leads strategic and regulatory activities related to broadcasting networks, satellite communications, spectrum coordination, and the implementation of modern electronic communications frameworks. Her professional focus encompasses broadband development, frequency management, regulatory harmonization with European Union and International Telecommunication Union standards, as well as the advancement of efficient and innovative spectrum policies.

Throughout her career, she has actively contributed to numerous international initiatives, expert groups, conferences, and regulatory processes within the frameworks of the ITU, CEPT, and the European Union, representing Macedonia in key discussions related to digital transformation and telecommunications policy.

She holds a Master's degree in Telecommunications underpinning her extensive expertise in spectrum management, broadcasting, and electronic communications regulation.
